MaxSpan: (Object) The maximum lapse between the selected start and end dates. Click on Ranges in the configuration generator for examples. AutoApply: (True / False) Hide the Apply and Cancel buttons, and automatically apply a new interval of dates as soon as two dates are doubled. This option will be highlighted when the selection of the current date range does not match one of the predefined ranges. If you provide a string, you must coincide with the date format string established in its regional configuration. show.daterangepicker: is triggered when the hide.daterangepicker selector is displayed: activated when the selector is hidden showcalendar.daterangepicker: triggered when the calendar (s) is displayed. It was activated when the Apply button is clicked, or when clicked CANCEL.DATERANGEPICKER: On when the Cancel button is clicked, some applications need a "erase" instead of a "Cancel" functionality, which can be Achieve changing the button tag and observing the cancellation event: While it passes into a callback to the constructor is the easiest way to listen to changes in the selected dates range, you can also do something every time Click on the Apply button, even if the selection has not changed: Configuration generator The MIT license (mit) Copyright (c) 2012-2019 Dan permit "N Dan Gress Gressman, is awarded, free of charge, and its value array with two dates representing the bounds of the range. maxYear: (number) The maximum year shown in the dropdowns when showDropdowns is set to true. When disabled, the two calendars can be individually advanced and display any month/year. timePickerSeconds: (true/false) Show seconds in the timePicker. showCustomRangeLabel: (true/false) Displays "Custom Range" at the end of the list of predefined ranges, when the ranges option is shown. buttonClasses: (string) CSS class names that will be added to both the apply and cancel buttons. setStartDate(Date or string): Sets the date range picker's currently selected start date to the provided date setEndDate(Date or string): Sets the date range picker's currently selected end date to the provided date Example usage: Events Several events are triggered on the element you attach the picker to, which you can listen for. Comments isCustomDate: (function) A function that is passed each date in the two calendars before they are displayed, and may return a string or array of CSS class names to apply to that date's calendar cell. timePickerIncrement: (number) Increment of the minutes selection list for times (i.e. 30 to allow only selection of times ending in 0 or 30). minDate: (Date or string) The earliest date a user may select. Clicking it will display the calendars to select a new range. applyButtonClasses: (string) CSS class names that will be added only to the apply button. singleDatePicker: (true/false) Show only a single calendar to choose one date, instead of a range picker with two calendars. Check off locale in the configuration generator to see how to customize these options. The start and end dates provided to your callback will be the same single date chosen. chosen.
